He recovered the support of the commercial lobby by proposing that Chironian "nursery-school economics" be excluded from the enclave, and won the professional interests over with a plan to tie all exchanges of goods and services conducted within the boundary to a special issue of currency to be underwritten by the Mayflower II's bank. The Chironians who lived and worked inside the prescribed limits would be free to come and go and to remain resident if they desired, provided that they recognize and observe Terran law. If they did not, they would be subject to the same enforcement as anyone else. Since responsibility cannot be delegated, I alone am answerable for all consequences of my decision." He paused to look around the room, and then took a long breath. "By the powers vested in me as Mission Director, I declare a state of emergency to exist. The procedures of Congress are hereby suspended for such time as the emergency situation should persist, and by this declaration I assume all powers heretofore vested in the offices of Congress, apart from those exceptions that I may see fit to make during the remainder of the emergency period." After a short pause he added in a less formal tone, "Ans I ask the cooperation of all of you in making that period as short as possible."..Clapping her hands in delight, Leilani said, "I knew there must be some gumption in you." "It was a group, just like I've been saying--something to belong to. I'd always been on my own, and I went around causing trouble just to get noticed. People are like that. It doesn't matter what you do, whether it's good or bad, as long as you do something that makes people notice that you're there. Nothing's worse than not making any difference to anything." Colman shrugged. "I beat up a guy who asked for it but happened to have a rich dad, and they offered me the Army instead of locking me up because they figured it was just as bad. I jumped at it."..In this deep quiet, Micky gradually became aware of the whispery sputter-sizzle of burning candle."That would be quite all right," Celia said.."And that bothers you?..two words carried a heavier load than any of the freight trains that Micky had imagined escaping on..Sirocco shrugged noncommittally. "Can't say. I wouldn't worry too much about it. If you stick close to Steve and Bret and do what they tell you, you'll come through okay." Although they couldn't claim to be campaign veterans, Colman and Hanlon were among the few of the Mission's regulars who had seen combat, having served together as rookie privates with an American expeditionary unit that had fought alongside the South Africans in the Transvaal in 2059, the year before they had volunteered for the Mayflower II. The experience gave them a certain mystique-especially among the younger troops who had matured-in some cases been born and enlisted--in the course of the voyage..- out of the way. It was a communication from Leighton Merrick, the Assistant Deputy Director of Engineering in the Mayflower II, routed for comment via Headquarters and Brigade. It advised that, due to an unexpectedly high rate of promotions among junior technicians, Engineering was flow able to give "due reconsideration" to the request for transfer filed by Staff Sergeant Colman. Would the Military please notify his current disposition? "Looks like they're running out of Indians," Sirocco remarked. "What do you want me to say?..drained of words, often until his throat grew dry and hot.."Son-of-a-something, anyway," Anita added. A universe provided, in effect, a screen upon which the same projections were repeated over and over again as a consequence of the separation of the space and time dimensions of the screen itself, which of course was why every dum was the same as every

other dum, and every dee the same as every other dee. It was as if a typewriter created paper as it typed on, leaving the planar inhabitants of the flat universe that it had brought into being to ponder why all the characters encountered serially in their own "flat-time" should have exactly the same form.. "You're the first Terran we've talked to," Shirley said. She nodded her head to indicate the direction they had come from. "We've got a class of kids back there who are bubbling over with curiosity. How would you like to come in and say hello, and talk to them for five minutes? They'd love it." Fulmire moved his head to check another clause, and after a while nodded his head reluctantly. "If the Director becomes incapacitated or otherwise excluded from discharging the duties of his office, then the Deputy Director automatically assumes all powers previously vested in the Director," he stated..members who had been absent had returned for the occasion, and the only seats left vacant were those of the Deputy Mission Director, the Director of Liaison, the Commanding General Special Duty Force, and two others who had chosen to throw in their lot with Stern. Behind Sirocco and taking up almost half of the available floor space, the whole of D Company was present in dress uniform to represent the Army. Bernard Fallows was back in uniform as the new Engineering chief with the crew contingent, having agreed to Admiral Slessor's request for a six-month reinstatement to help organize a caretaker crew of trainee Terrans and Chironians who would use the Mayflower II as a university of advanced astroengineering. Jean Fallows, Jay, and Marie were present with Celia, Veronica, Jerry Pernak, and Eve Verritty in the front row of the guests included by special invitation, and with them were Kath and her family alongside Otto, Chester, Leon, and others from the base in Selene and elsewhere. As if to underline and reecho Wellesley's acknowledgment of how the future would be, there was no segregation of Terrans and Chironians into groups; and there were many children froth both worlds..Popping open a Budweiser, Micky returned to her chair. The theory opened up whole new realms, Pernak was beginning to appreciate as he sat back in his office to give his mind a rest from absorbing the information being presented on the wall screen opposite. I think that's what we're up against.. "That's how they get rich," Pernak said. "By being good at what they do and getting better. Who but a crazy would do anything and stay poor by choice?". CHAPTER THIRTY-SIX. Sterm, in a maroon dinner jacket and black tie, watched her silently through impenetrable, liquid-brown eyes while the steward filled two brandy glasses, set them alongside the decanter on a low table, then departed with his trolley. Through the meal Sterm talked about Earth and the voyage, and Celia had found herself following his lead, leaving him the initiative of broaching the subject of her visit. Finally.. searching for him in attic, closets, cellar.. Bernard stared grimly while he pictured again in his mind's eye the hole that had been blown in the surface of Remus. "We've got. to stop it," he breathed. "We've got to get a message up there somehow. . . to Sterm. . . telling him what he's up against. Thousands of people are still up there.. Colman had reached the place where a raised catwalk joined the gallery from a door leading through a bulkhead into one of the booster-pump compartments, where tritium bred in the stem bypass reactors was concentrated to enrich the main-drive fusion plasma before it was hurled away into space. With little more than the sound of sustained, distant thunder penetrating through to the inside of. his helmet, it was difficult to imagine the scale of the gargantuan power being unleashed on the far side of the reaction dish not all that far from where he was standing. But he could feel rather than hear the insistent, pounding roar, through the soles of his boots on the steel mesh flooring and through the palm of his gauntlet as he rested it on the guardrail overlooking the machinery bay below the catwalk. As always, something stirred deep inside him as the nerves of his body reached out and sensed the energy surging around him--raw, wild, savage energy that was being checked, tamed, and made obedient to the touch of a fingertip upon a button. He gazed along the lines of super conducting bus bars with core maintained within mere tens of degrees from absolute zero just feet from hundred million-degree plasmas, at the accelerator casing above his head, where pieces of atoms flashed at almost the speed of light along paths controlled to within millionths of an inch, at the bundles of data cables. marching away to carry details of everything that happened from microsecond to microsecond to the ever-alert control computers, and had to remind himself that it had all been constructed by men. "Say, who've we got over here? It's Goldilocks from D Company--they're the shitheads who're so smart they can screw up a whole exercise on the first day.. " Colman felt the floor vibrate as heavy footfalls approached the booth. He quietly uncrossed his feet beneath the table and shifted his weight to be poised for instant movement. His fingers curled more snugly

He looked up to find Padawski leering down from about three feet away..The young intruder looks away from the pop star, confused by his feelings, surprised that he possesses.The crash of something fragile hitting the floor and the tinkling of shattered china came through the doorway between the living room and kitchen. Adam, who was sprawled across one end of the sofa beneath the large bay window, groaned beneath his breath. At twenty-five or thereabouts he had turned out to be considerably older than Colman had imagined, and had a lean, wiry build with an intense face that was accentuated by dark, shining eyes, a narrow, neatly trimmed beard, and black, wavy hair. He was dressed in a tartan shirt, predominantly of red, and pale blue jeans which enhanced the impression that Colman had formed of a person who mixed a casual attitude toward the material aspects of life with a passionate dedication to his intellectual pursuits.
