The speech reminded him of the old-time slave ships which arrived carrying messages of brotherhood and love, but with plenty of gunpowder kept ready and dry below decks. Was it possible for people to be conditioned to the point that they believe they are doing one thing when in reality they are doing the exact opposite, and to be blind to the contradiction? He wondered what the Directorate might have found out about Chiron that it wasn't making public..his master's side..Lechat nodded. It was known officially as Warhead Refinishing and Storage, and unofficially as the Bomb Factory. Nobody worked there. Machines took care of routine operations, and engineers visited only infrequently to carry out inspections or to conduct out-of-the-ordinary repairs. Nevertheless, it was a military installation containing munitions, and according to regulations, that meant that it had to be guarded. The fact that it was already virtually a fortress and protected electronically against unauthorized entry by so much as a fly made no difference; the regulations said that installations containing munitions had to be guarded by guards. And guarding it, Colman thought, had to be the lousiest, shittiest job the Army had to offer..When Jean appeared in the doorway, Bernard was fiddling with an assembly of slides and cranks that he had set up in a test jig. She watched while he pushed a tiny rod which in turn caused all the other pieces to slide and turn in a smooth unison, though what any of them did or what the whole thing was for were mysteries to Jean, Bernard pulled the rod back again to return all the pieces to their original positions, then looked up and grinned. "I have to

take my hat off to Army training," he said. "I'll say one thing for Steve Colman-he sure knows what he's doing. Our son has produced some first-class work here." He noticed the expression on Jean's face, and his manner became more serious. "Aw, try and snap out of it hon. I know everything's a bit strange. What else can you expect after twenty years? Colman was squeezed back against his seat for the next two minutes or so, after which the screen cut back to a noseward view, and a series of topsy-turvy sensations came and went as the flight-control computers brought the ship round once more for its final approach, using a combination of low-power main drive and side-thrusters to match its position to the motion of the Kuan-yin. After some minor corrections the shuttle was rotating with the Kuan-yin to give its occupants the feeling that they were lying on their backs, and nudging itself gently forward and upward to complete the maneuver. The operation went smoothly, and shortly afterward the captain's voice announced, "Docking confirmed. The boarding party is free to proceed.". "They must be, mustn't they," Mrs. Crawford agreed blissfully. She shook her head. "In some ways it seems almost criminal to take them, but..." she sighed, "I'm sure they'd just be wasted otherwise. After all, those people are obviously savages and! quite incapable of appreciating the true value of anything." Celia's throat tightened, but she managed to remain quiet. Mrs. Crayford fussed with her pile of boxes. "Oh, dear, I wonder if I should leave some of them here after all and have them picked up later. "A bunch of us tried to take over in there after the broadcast, but there were too many who figured that was the safest place to be and wouldn't quit. It was all we could do to get out.".The capacity of the complex itself took account of long-range-demand forecasts and. more than outstripped the current requirements of the industries scattered around the general area. Its primary power source was a one-thousand gigawatt, magnetically confined fusion system which combined various features of the tokamak, mirror, and "bumpy toms" configurations pioneered toward the end of the previous century, producing electricity very efficiently by blasting high-velocity, high-temperature, ionized plasma through a series of immense magnetohydrodynamic coils. In addition, the fast neutrons produced in copious mounts from this process were harnessed to breed more tritium fuel from lithium, to breed fissionable isotopes of uranium and plutonium from fertile elements obtained elsewhere in the same complex, and to "burn up" via nuclear transmutation the small mounts of radioactive wastes left over from the economy's fission component, the fuel cycle of which was fully closed and included complete reprocessing and recycling of reactor products..will allow a slight diminishment of his fear..everyone was beautiful and rich and happy. Leilani didn't actually search for the passageway, but based."Are you never serious?" Micky asked. "Are you always making with the wisecracks, the patter?".A short silence fell while the meeting digested the observation. Kalens thought about the fusion complex that Farnhill had learned about in his largely unproductive talks with an assortment of Chironians in Franklin. Kalens had sent Farnhill off to learn what he could through more casual contact and conversation, after Borftein's sarcastic remark to the effect that the Army's company of misfits seemed to be making better progress with the natives than the diplomats

were managing. "Yes... I know what you mean," Kalens said, acknowledging Stern with a motion of his head. "As a matter of fact, we have already begun inquiries along those lines." He turned toward Farnhill. "Amery, tell us again about that place along the coast." She had a trick of locking her brace and pivoting on her steel-assisted leg. Even as she heard the hiss or many years ago..She swallowed as she traced through her thoughts and, checked herself. She was rationalizing or hiding something from herself, she knew. Howard had come home enough times angry and embittered after pressing for measures to halt the decay and being overruled. He was doing what he could~ but the influence of the planet was all pervasive. She was merely projecting into him and personifying something else--something that stemmed from deep inside her. Even as she felt the first stirring of something deep within her mind, the vision came of herself and Howard, alone and unbending, left isolated in their backwater while the river flowed on its way, unheeding and uncaring. After twenty years, nothing lay ahead but emptiness and oblivion. The cold truth behind her rage toward Howard was that her protector was as helpless as she..Fallows stood up and stepped aside, and Waiters eased himself into the 'subcenter supervisor's chair. "You're off.Bernard was nodding but with evident reservations. "True," he agreed. "But it's up in the ship, not down here. And it must be strongly protected. It's a vicious circle- you'd have to get in there to turn the Army around, but they're going to be outside and stopping your getting in until you've done it.
