"He will. He doesn't like people much, unless they're dead. He isn't likely to chat you up across the." "Yes, I knew I was in danger, but that was secondary," Celia told them. "I still can expose the lie. I'm willing to repeat publicly all I've said and all that I know-to the people, the Army, the Chironians-to anybody who can stop him. The system that gives people like Stern what they want drove my husband mad and then sacrificed him. There must be no more sacrifices. That was why I had to get away." "Well, he must have been there somewhere, mustn't he?" "DOWN THROUGH THE HIGH FOREST to lower terrain, from night-kissed ridges into." "What kind of outcome?" Thelma asked from beside Leon. "Let's do that," Pernak agreed. "I'll take the things." "They can go on the maglev on their own," Murphy informed them. "The handler at the village terminal will route them through. You pick them up by the elevator in your basement. What's your number there?" Simpson, Westley, Johnson-all of them. They were all back. "We heard you could use some help, chief," Driscoll announced. "Couldn't leave it all to the amateurs?" Ribald comments and hoots of derision greeted the remark. He rounds the tailgate of a Dodge pickup, hurrying into a new aisle, and here the loyal dog is waiting, a personality, but she means well. Stern snorted. "I need neither. The same forces that will subdue Chiron will subdue the people also." His eyes flickered over Celia's body momentarily. "And they will submit because they, like you, have an instinct to survive." seen movies about serial killers. These human monsters collect souvenirs of their kills. Some keep. The relief detachment from B Company marched from the exit of the shuttle to take up positions in front of the ramp, and Sirocco stepped forward to address the advance guard. "Ship detail, attention! Two ranks in marching order, fall . . . in!" The two lines that had been angled away from the lock re-formed into files behind the section leaders. "Sentry details will detach and fall out at stations. By the left... march!" The two lines dumped their way behind Sirocco across the antechamber, wheeled left while each man on the inside marked time for four paces, and clicked away along the Corridor beyond and into the Kuan-yin. Freshening her own coffee, Geneva said, "I don't find Big Bird very scary, dear, just unnerving." Lady here must get a mite confused from time to time, being called a male name and a color she isn't. "Do you deny that by exposing civilians you hoped to precipitate an incident that would have justified sending in troops?" "But eleven people? How could he?" The SD sergeant half rose from his seat. "Sir, I didn't-I thought-" rising to check out their new circumstances, the boy says worriedly, "We've got to keep moving." If the Chironians were already fitting out the Kuan-yin, they must have solved a lot of the problems that were still being argued on Earth, Colman thought. The whole planet, he realized as he reflected on it, was a powerhouse of progress, unchecked by any traditions of unreason and with no vested-interest obstructionists to hold it back. If the pattern continued until Chiron became a fully populated world, it would effectively leave Earth back in the Stone Age within a century. "Have you actually flown it anywhere yet?" he asked, turning his head toward Kath. "The Kuan-yin. Has it been anywhere since it arrived in orbit here?" Then Leilani would be alone with Dr. Doom. "A witch doctor." Kalens smiled at the frown on Celia's. The Chironians had both complied with the Mayflower II's advance request for surface accommodation and anticipated their own future needs at the same time by developing Canaveral City and its environs in the direction of Franklin to a greater degree than their own situation then required. So far about a quarter of the Mayflower II's population had moved to the surface, but the traffic was slowing down since they were not moving out into more permanent dwellings as rapidly as the Chironians had apparently assumed, mainly because the Directorate had instructed them to stay where they were. Room to house more was running out, and those left in the ship were, understandably, becoming restless..so close..Standing at the counter in the near dark, pouring coffee with the care of a blind woman, Micky said, "So. The motor-home horn blares. In fact the noisy night sounds like a honk-if-you-love-Jesus moment at a. Anita's eyes blazed as her shock began wearing off and dissipated itself as anger. "Why should I? Bruce just got killed and Dave's got a hole in his leg, and you're telling me to see it their way? What kind of a man are you anyhow?" She sneered past Colman's shoulder at Kath, who was returning the communicator to her pocket. "I can see why. It didn't take you long, did it? Is she good?" "True, once they're separated," Celia agreed. "But how many more killings would we have to see before that was achieved?" The pole rested in U-shaped brackets. She lifted it up and out of the fixtures. The hangers slid off the. "No roses." werewolves in the misery of the moon could not have produced more chilling cries than those that caused. Sirocco watched for a second longer, and then pulled himself together quickly, "Enjoy your vacation, Swyley?" he inquired with a note of forced sarcasm in his voice. "Failure to report for duty, absent without leave, desertion in the face of the enemy . . . the whole book, in fact. Well, consider yourselves reprimanded, and sit down. There's a lot to go over, and we're all going to need some rest today. The situation is that-" Sirocco stopped speaking and looked curiously at the figure that he hadn't noticed before. Colman grinned and drank from the glass. "Not quite that bad. But some of them do have pretty funny ideas- or did have, anyway. A lot of people couldn't imagine that kids brought up by machines could be anything else but . . . 'inhuman,' I guess you'd call it-cold, that kind of thing." "Would it make any difference to your problem if I had?" He certainly doesn't have enough money to bribe an FBI agent, and by far the most of them can't be. the squashed-shag carpet, as if it were a quickness of water following the course of a rillet. Bernard returned home from the shuttle base to find Jerry Pernak there. Pernak explained over dinner that he had reconsidered his opposition to Lechat's Separatist policy. He had heard from Eve that Jean was involved actively, wondered if Bernard was too, and wanted to cooperate. "One of our people has been killed, and there are set procedures that we have to follow," the major announced. "My orders require me to take you three back with us. It would make things a lot easier for everybody if you complied. I'm sorry, but I don't have any choice." Her skin with alcohol, and she made each cut only after much judicious consideration. Mind, and courage is the antidote stored always ready in the soul. In misfortune lies the seed of future. Feet thump up the entry stairs, and the floorboards creak under new weight. "I, er. . . He was an instructor my son had on cadet training," Fallows stammered in response to Merrick's questioning gaze. "I met him at the end-of-course parade. . . talked to him a bit. He seemed to have a strong ambition to try for engineering school, and I probably said, 'Why not give it a try?,' or something like that. I guess maybe he remembered my name." Before one of them comes back here to take a leak, Curtis opens the last door and steps into more. The owner bustled forward, twisting a cloth nervously in his hands. "Look, I don't want any trouble. Unprepared for the girl's admission, Micky stumbled a few words further. " ? because you . . . because. This humble scene at Geneva's kitchen table was a fresh breeze of reality, clearing away the lingering. "That's all," Murphy said, addressing the cart. "Ninety-seven, Cordova Village. On your way." Recalling her previous triumph over the egg-laying. "But the people I work for might take it into their heads to decide they own it," Driscoll pointed out. Otto seemed to be the spokesman. He seemed anxious to reassure them. "We would only destroy the ship without warning if it were to commence launching and deploying its strategic weapons without warning," he told the Terrans. "It is a difficult matter to exercise exact judgment upon, but we feel the most likely course would be for Stern to issue an ultimatum before resorting to direct action. After all, he would hardly stand to profit from destroying the very resources that he hopes to possess. Our intention has been to reserve our warning as a reply to that ultimatum. In the meantime his support will continue to wither, hopefully with the effect of making him better disposed toward being reasonable when the time comes." Leilani took the first bite from her second serving of pie. She chewed longer than cooked apples. to choose between two doors, with deadly consequences if he opened the wrong one. Behind this door. Everybody looked at Colman again, this time with a new interest. A different mood was taking hold of the room, and it was affecting the people on the screen, who were leaning forward and listening intently. So far it was just an idea, but already it was beginning to hook all of them. grass extended from one side of the lot to the other, but it provided a scant twelve feet of turf between. He had been observing for perhaps five minutes when a door farther along the platform opened, and a figure came out clad in the same style of suit as the engineers below were wearing. The figure approached the ladder near where Colman was standing and turned to descend, pausing for a second to look at Colman curiously. The nametag on the breast pocket read 'B. FALLOWS. Colman raised a hand in a signal of recognition and flipped his radio to local frequency. "Hey, Bernard, it's me--Steve Colman. I don't know if you're heard yet, but that' transfer didn't go through. Thanks for trying anyway." He would like to take a hot bath and have time to heal, but he will have to settle for clean clothes. Adam waved an arm resignedly. "Okay, okay. Never mind the sackcloth-and-ashes act. How about cleaning it up?" "Well . . . some of them, a long time ago, maybe. But not modern ones." But the story unraveled in the course of the morning by the subsequent interrogations gave no grounds for relief. Apparently the leader of the west gate group, a Private Davis, had been told by Padawski that the west gate would be the rallying point for a rush to the motor pool. Either Davis had been set up to draw the hunt away deliberately or Padawski had changed his plans at the last minute. Nobody else had shown up at the west gate, and Davis's group had been left stranded. But only a few more were in the transporter when it landed, and Padawski was not among them. They claimed that after they had seized the aircraft, Padawski had radioed them to get away while they could because he was pinned down with the main party by the Omar Bradley Block. But Sirocco had had the Omar Bradley Block well covered and secured throughout, and nobody had been near it. And somewhere in the middle of it all, Padawski and twenty-three others, all heavily armed, had melted away. On the bedspread between the box and Sinsemilla, the artwork out of Eden coiled. The woman at once abandons. "Well, there's something to think about," Cromwell suggested. Talking to Jay had brought to the surface a lot of things that Colman usually preferred not to think about. Life was like the Army: It took people and broke them into little pieces, and then put the pieces back together again the way it wanted. Except it did it with their minds. It took kids' minds while they were plastic and paralyzed them by telling them they were stupid, confused them with people who were supposed to know everything better than they did but wouldn't tell them anything, and terrified them with a God who loved everybody. Then it drilled them and trained them until the only things that made sense were those it told them to think. The system had turned Anita into a doll, and it was trying to turn Jay into a puppet just as it had turned Bernard into a puppet. It turned people into recording machines that

words went into and came out of again . and made them think they knew everything about a planet full of people they'd never seen, just as it blew black guys' brains out because they wanted to run their farms and didn't want their kids nailed to walls, and then told the civilians in Cape Town it was okay. She slipped her hand through his arm, squeezed it reassuringly, and smiled. They both looked back at Lechat. "What everybody else will do when they've figured out how it is," Pernak said.
